New Breather

We would like to inform you about an upcoming change in our delivery program in the range of Drinking-Systems.

For our present breather item no. 3307-00 we have developed a new breather cap and hose nozzle.

Because of the integrated plastic ball the new breather item no. 3317-00 closes up even at slowly rising water column.

The new hose nozzle has a wrench flat for fastening and also two non-slip areas for easy hand assembly.

The changeover of all breathers to the new version will take place at the beginning of May.

We would also inform you that we have two new conduit hangers Ø32 mm in our program. Item no. 3453-00 - Conduit hanger, Ø32 mm, yellow and item no. 3454-00 – Conduit hanger for cage, Ø32 mm, yellow.

Please contact us if you have any questions.

Best regards,

LUBING SYSTEM SRL
